WORK EXPERIENCE

T-Mobile Legal Emergency Response, Parsippany-Troy Hills, NJ

Data Entry Specialist, September 2024-present

- Processed and routed 75-100 legal documents daily within T-Mobile's Legal teams for appropriate handling by inputting case and external requester information along with relevant identifiers, ensuring accuracy and confidentiality.
- Manage and conduct 75-90 preservation cases per week, ensuring proper data collection and storage, by processing and auditing.
- Provide clerical support sorting 50-100 mailed legal documents on a daily basis, sending out packages to the finance team in other corporate offices.
- Accept and sign for the legal process on behalf of LER.

SERV Clifton Community Behavioral Health Center, Clifton NJ

Part-time Receptionist, July 2024-Sept 2024

- Provided clerical support, including data input, chart audits, and document processing.
- Ensured high accuracy and confidentiality in handling sensitive client information.

FDU Fitness Center, Teaneck, NJ

Front Desk, May 2023-May 2024

- Managed front desk operations, assisting members and providing minor tech support.
- Handled customer service inquiries and maintained facility records.

Certifications

ISC2 CC - August 2024

Projects

COVID-19 Interactive Tracker – Tableau

- Managed end-to-end data analytics to visualize state-by-state statistics on cases and deaths.
- Utilized data cleaning techniques in Excel to prepare raw data for analysis.
- Using Tableau Desktop, created interactive columns, map, line charts and dashboards with dynamic sheet swapping and contextual elements, delivering clear insights into COVID-19 trends.

IT Capstone Project – Spotify Streaming Data Analysis & Visualizations

- Led an analysis of personal Spotify streaming data, employing data visualization techniques using Tableau, Excel and Python (using Panda's library) to gain insight in trends and patterns.
- Acquired the data, cleaned it of null values or duplicate records, and organized it using Python to ensure accurate and efficient analysis.
- Utilized algorithms to derive actionable insights and trends from the streaming data, translating these findings into visually compelling representations, such as heatmaps and bubble charts and an informative report.
- Demonstrated ability to manage large datasets, ensure data quality, and generate actionable insights through analysis and visualization.
